PROFESSIONAL SUMMARY

Data & Analytics professional with 5+ years of experience translating complex datasets into actionable insights and executive-ready reporting. Proven track record partnering with cross-functional and global stakeholders to drive data-informed decision-making, build scalable dashboards in Tableau and Power BI, and develop repeatable reporting frameworks. Experienced in SQL, Python, ETL pipelines, A/B testing, and leveraging Generative AI tools to accelerate analytics workflows. Strong communicator skilled at tailoring insights to diverse audiences from frontline teams to senior leadership.

SKILLS

Data Analytics & Visualization: Tableau, Power BI, Looker, Streamlit, Plotly, Excel, Watershed, Dashboards, QBR/MBR

Data Engineering & Pipelines: SQL, Python, Spark, ETL Pipelines, Data Modeling, Cloud Data Warehouses, Schema Design

ML & AI Analytics: A/B Testing, Hypothesis Testing, Regression, Time-Series Forecasting, NLP, Executive Dashboards, Statistical Modeling, Generative AI tools, workflow automation, CRM platforms, Agile/Scrum

Soft Skills: Cross-Functional Stakeholder Enablement, Self-Service Analytics, Needs Assessments, Repeatable Templates, Agile/Scrum

WORK EXPERIENCE

Product Data Analyst (Oct 2023 – Present)

3D Technologies Pvt Ltd | Arlington, TX

- Collaborated with product managers and global stakeholders to translate business objectives into clearly **defined metrics**, analyses, and experimentation plans delivering recurring QBR/MBR-style executive reports across AI-enabled products.
- Designed and maintained interactive, executive-ready **dashboards and reports** in **Tableau** and **Power BI** monitoring trends across millions of records, reducing reporting latency by 37% and enabling data-driven decision-making at scale.
- Created standardized reporting templates and automated **ETL pipelines** using **Python** and **SQL** on cloud data warehouses, enabling global and regional teams to autonomously track KPIs and performance metrics with consistent data.
- Designed and executed **A/B testing** and **multivariate testing** to evaluate model and agent behavior, improving customer engagement by 24% and campaign ROI by 13%, translating findings into actionable roadmap recommendations.
- Applied **time-series forecasting**, t-tests, and **regression** modeling in Python to evaluate campaign performance and user trends, surfacing insights that improved targeting ROI by 13%.
- Leveraged **Generative AI** tools to accelerate reporting workflows, automate recurring analysis tasks, and improve interpretability of insights for non-technical stakeholders.
- Worked with **data governance** teams to ensure responsible data usage, metric consistency, and alignment.

Data Analyst (Feb 2018 – Mar 2021)

Atsuya Technologies Pvt Ltd | Chennai, India

- Queried and transformed large-scale datasets using **SQL** to support exploratory analysis, stakeholder reporting, and business insights, **automated pipelines** to dramatically reduce manual reporting time.
- Built self-service **dashboards** in Power BI and Tableau, partnering with non-technical stakeholders to define **KPIs**, improve data literacy, and enable autonomous reporting across business teams.
- Partnered with global and regional teams to understand reporting requirements, conduct needs assessments, and deliver tailored data solutions, translating complex datasets into clear, audience-appropriate visual insights.
- Performed **NLP**-based text and **sentiment analysis** on customer feedback data, driving a 15% engagement lift and providing actionable product feedback to leadership.

EDUCATION

Master of Science, Computer Science (Clemson University, Clemson, SC)

Bachelor of Technology, Computer Science (SRM University, Chennai, India)

ACADEMIC PROJECTS

Social Media Sentiment Analysis Dashboard | 2025

- Built an NLP-powered, real-time interactive Streamlit dashboard surfacing sentiment trends across airline brands — reducing analysis time by 40% and improving interpretability of customer sentiment themes by 38%.
- Defined success metrics and reporting workflows using Pandas, Plotly, and Matplotlib; enabled non-technical stakeholders to identify emerging issues and brand perception shifts autonomously.

Customer Review Analysis Using Regression | 2024

- Applied NLP techniques (tokenization, lemmatization, TF-IDF) using NLTK and Pandas to extract actionable product insights from customer reviews; created visual summaries for non-technical stakeholders.

University Acceptance Rate Prediction Using Regression Models | 2024

- Built predictive models (Linear Regression, Random Forest, Decision Trees, ANN) and translated outputs into dashboards and reports for non-technical academic stakeholders.
